Neuma MindScape

PSYCHEDELIC STORY ATLAS

By: Muhammad Ibrahim, Mustafa Tariq, Connor Killingbeck, Khoa Nguyen

Table of contents

1. PROJECT OVERVIEW

Enhancing wellness through AI-driven psychedelics research, promoting safe and informed experiences.

2. CURRENT PROCESS

Researchers analyze data in-depth, administrators ensure system operation, and contributors submit experiences.

3. USER GROUP

Outdated survey system lacks efficiency, autonomy, and AI integration; termed "barbaric" by clients.

4. PROPOSED PROCESS

New system streamlines data collection and analysis for contributors and researchers.

GLOSSARY

Models - In the field of machine learning and mathematics, a model represents the relationships between some variables. In this case, it is a program that can return some data given some inputs.

Natural Language Processing (NLP) - A sub-field in machine learning concerning human language.

AI - Artificial Intelligence.

Erowid - A database that contains the experiences of people on psychedelics.

PROJECT OVERVIEW

Key Program Concepts

AI-ENHANCED NARRATIVE GATHERING

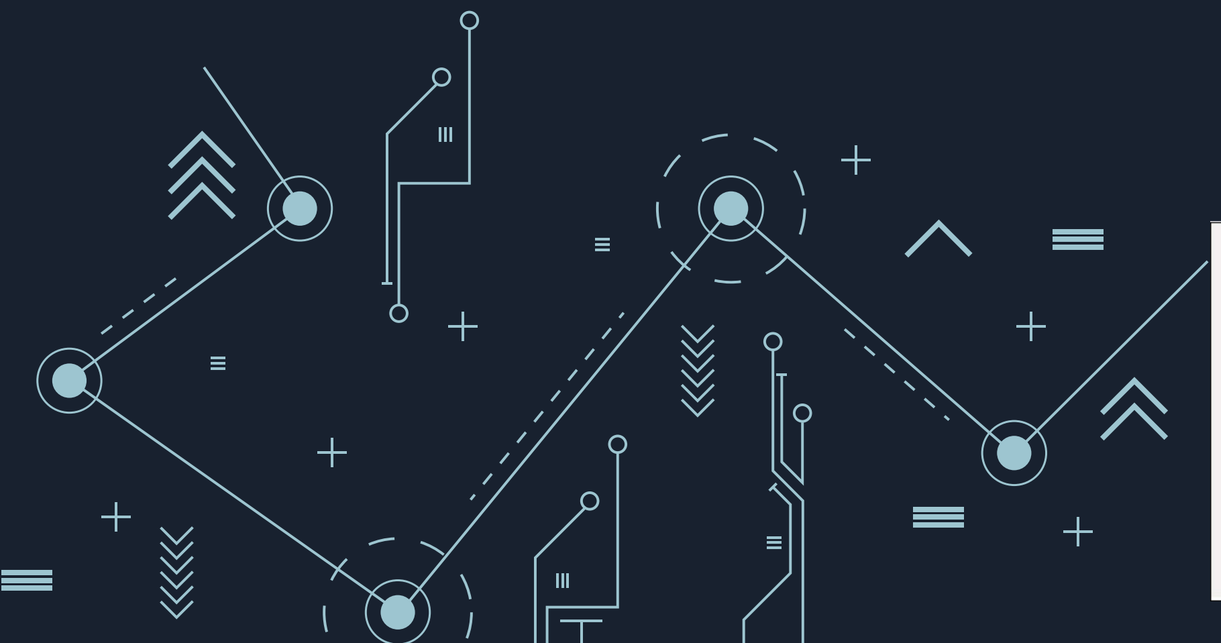

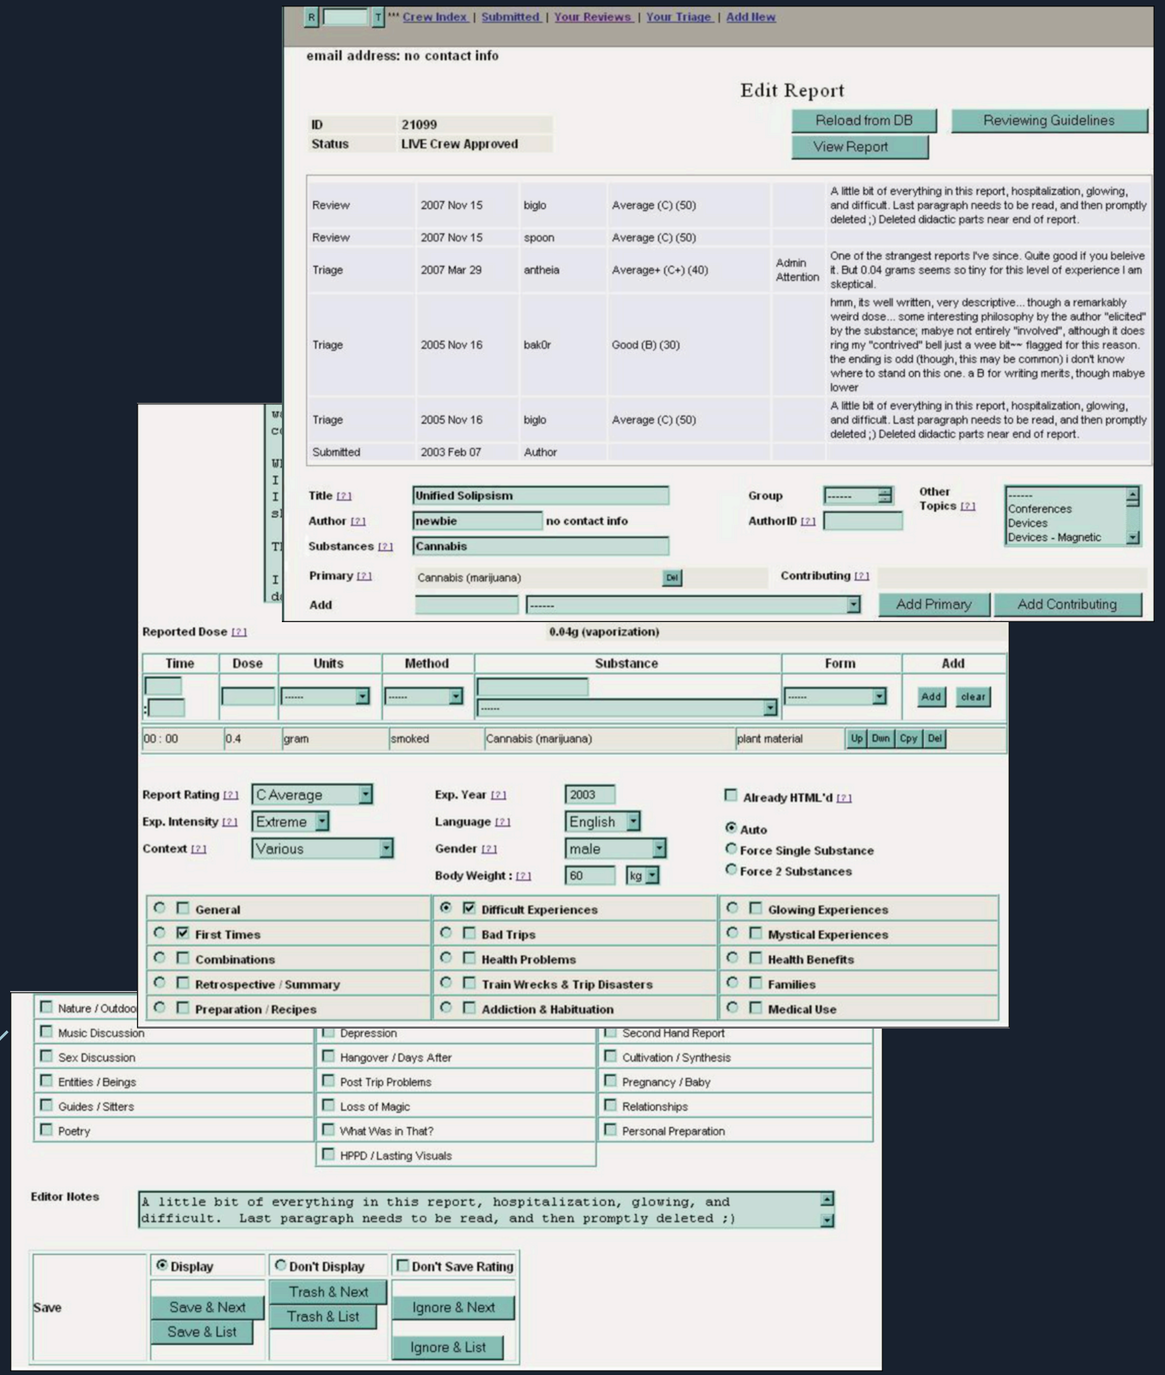

INCLUSIVE DATA COLLECTION

INSIGHTFUL DATA ANALYSIS

CURRENT PROCESS (EXISTING FORMS)

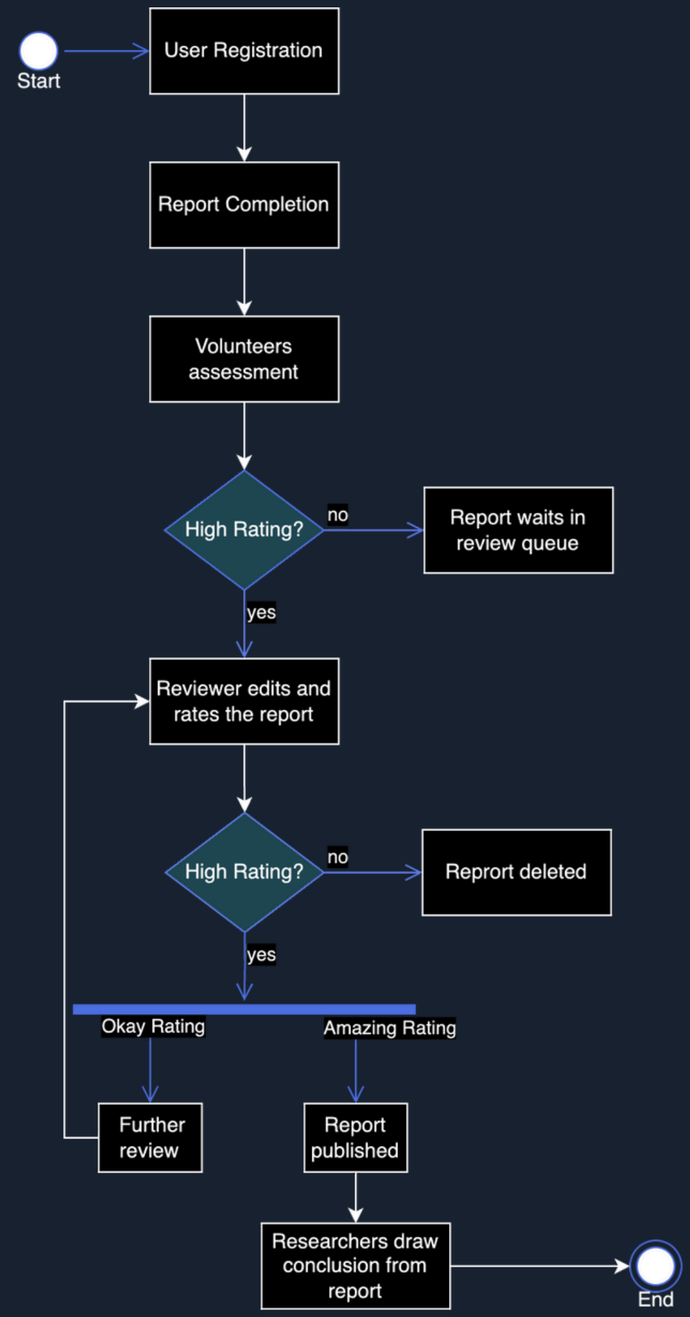

IBRAHIM

2nd speaker

CURRENT PROCESS [FLOW]

IBRAHIM
2nd speaker

USER GROUPS

RESEARCHERS

In-depth data analysis, trend identification, report generation for academic/scientific purposes.

ADMINISTRATORS

Ensure system operation, manage user accounts, clear irrelevant data, collaborate with researchers.

CONTRIBUTORS

Share personal experiences, seek feedback, user-friendly interface for data submission.

GUEST USERS

Explore public data and insights without registration, limited interaction capabilities.

PROPOSED PROCESS

FUNCTIONAL REQUIREMENTS (CRITICAL)

ID	Priority	Requirement
SC1	Critical	User Account Security
UX1	Critical	User Registration
UX4	Critical	Recording User Experiences
UX5	Critical	User Experience Reports
UX7	Critical	Bug Reporting and Feedback
UX8	Critical	Password Recovery
UX10	Critical	Account Deletion
SC2	Critical	Admin Privileges
UX3	Critical	Researchers' Data Access
DA1	Critical	Data Anonymization

FUNCTIONAL REQUIREMENTS (IMPORTANT)

ID	Priority	Requirement
UX2	Important	Guest User Access
UX9	Important	User Dashboard
UX12	Important	Account Onboarding Guide
UX15	Important	User Notifications
UX16	Important	Consent Revocation
MR1	Important	Research User Registration
MR3	Important	Integrity Alerts

KHOA
4th speaker

PROPOSED PROCESS

NON-FUNCTIONAL REQUIREMENTS

ID	Priority	Requirement
US1	Critical	Easy to Use
PF1	Important	Fast and Responsive
PF2	Critical	Progress Bar
SC1	Important	Scalable to High Data Volume
RE1	Important	Reliable Availability
RE2	Optional	Easy to Maintain
SE1	Critical	Combat Common Attacks
SE2	Optional	Database Hosted Locally
